 Additional information: If the chamical name/CAS number is proprietary and or weight percentage is listed as a range, the specific chemical identity and or percentage of composition has been withheld as a trade secret.

4 First-aid measures

Description of first aid measures After inhalation:

Remove victim from exposure to fresh air. Keep person at rest. Provide oxygen if person is not breathing. Supply fresh air and if symptoms occur call for a doctor.

- In case of unconsciousness place patient stably in side position for transportation.
- After skin contact:

Immediately wash with water and soap and rinse thoroughly. Remove all contaminated clothing and wash before reuse. If skin rash or irritation occurs, seek medical advice.

- After eye contact:

Immediately flush opened eyes with water for 5 minutes, then remove contact lenses if present, continue flushing for at least another 15 minutes. Get medical attention.

After swallowing:

If victim is unconscious; never give anything by mouth. If victim is conscious, rinse out mouth with water.

- Get medical attention
- Information for doctor:
 - Most important symptoms and effects, both acute and delayed No further relevant information available. Indication of any immediate medical attention and special treatment needed Check section 11 Toxicological Information for further relevant information.

5 Fire-fighting measures

Extinguishing media

- Suitable extinguishing agents: Use fire fighting measures that suit the environment. Alcohol resistant foam
- Carbon dioxide
- dry chemical **Special hazards arising from the substance or mixture** Will not burn unless preheated. acetone, aldehydes, ammonia and some organic materials. Carbon dioxide (CO) and Carbon monoxide (CO)

- · Advice for firefighters

Protective equipment: If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156).

As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.

6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use. Environmental precautions: Inform respective authorities in case of seepage into water course or sewage system.
- Methods and material for containment and cleaning up: For large spills: provide diking or containment to minimize spreading. If possible pump and store material in appropriate container. For small spills: Ventilate and wash area. Collect spills and absorbant material in appropriate container. Ensure adequate ventilation. Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Dispose contaminated material as waste according to item 13.

7 Handling and storage

· Handling:

Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols. Keep away from incompatible material(s). Avoid any release into the environment. Do not breathe dust/fumes/mist/vapor/spray. Avoid contact with eyes, skin and clothing. Keep away from heat,sparks, flames and ignition sources. Observe all the personal protection requirements in Section 8. · Conditions for safe storage, including any incompatibilities

Storage: Requirements to be met by storerooms and receptacles: Keep stored in accordance with local, regional, national, and international regulations.

 Evaporation rate 	Not determined.	
Solubility in / Miscibility with Water:	Not miscible or difficult to mix.	
· Partition coefficient (n-octanol/wate): Not determined.	
 Viscosity: Dynamic: Kinematic: VOC content: 	Not available. Not available. 0.00 % 0.0 g/l / 0.00 lb/gl	

10 Stability and reactivity

Reactivity No further relevant information available.
 Hazardous Reactivity and Chemical Stability Stable under normal conditions of use, storage and temperatures.
 Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
 Possibility of hazardous reactions In contact with incompatible materials.
 Conditions to avoid Keep away from heat, sparks, flame and any other ignition sources.
 Incompatible materials:

 Oxidizing agents
 Free radical producing initiators.
 Peroxides
 Bases (Alkalis)
 Hazardous decomposition products:
 Carbon Monoxide and Carbon Dioxide
 Aldehyde
 Ammonia
 Acetone

11 Toxicological information

· Information	on te	oxicological	effects
mormadon	011 0	, shoologioui	Checolo

· Acute toxicity:				
		ues that are relevant for classification:		
70131-67-	8 Siloxane	es and Silicones, di-Me, hydroxy-terminated		
Oral	LD50	>15,400 mg/kg (rat) Reference: ACToR (2011).		
Dermal	LD50	mg/kg (rabbit) (> 2000 mg/kg) > 16 mL/kg (rabbit) Reference: ACToR (2011).		
Inhalative	LC50/4 h	mg/l (rat) (LC50/7 hours > 8.75 mg/l) No changes were found in lung, thorax, or respiratory system. Reference: ACToR (2011).		
1333-86-4	Carbon b	lack		
Oral	LD50	>10,000 mg/kg (rat) (Toxicity not anticipated under normal conditions)		
Dermal	LD50	>3,000 mg/kg (Test species: n/a) (Toxicity not anticipated under normal conditions)		
Inhalative	Inhalative LC50/4 h mg/l (Test species: n/a) (Toxicity not expected based on acute oral data)			
Se Additi The pr Irritant	 Primary irritant effect: on the skin: No irritant effect. on the eye: Irritating effect. Sensitization: Sensitization possible through skin contact. Additional toxicological information: The product shows the following dangers according to internally approved calculation methods for preparations: 			
· Cá		c categories		
(000.00.0		ternational Agency for Research on Cancer)		
1333-86-4	1333-86-4 Carbon black 2B			
	· NTP (National Toxicology Program)			
None of th	e ingredie	nts is listed.		
	· OSHA-C	a (Occupational Safety & Health Administration)		
None of th	e ingredie	nts is listed.		

12 Ecological information

Toxicity
· Aquatic toxicity:
70131-67-8 Siloxanes and Silicones, di-Me, hydroxy-terminated
EC50 mg/kg (Human) Transient conjunctival irritation were observed in rabbits and humans within 24-48 hours after exposure. No more details wer available; the substance was classified as a dermal irritant (Category 2) for safety reason. Reference: HSNO CCID (2011).
1333-86-4 Carbon black
EC50 mg/kg (rabbit) (None showed any signs of skin irritation)

- Persistence and degradability No further relevant information available.
 Behavior in environmental systems:

 Bioaccumulative potential No data available.
 Mobility in soil No further relevant information available.

 Additional ecological information: The product is non-rapid degradable, and low or not highly bioaccumulative. Additional ecological information: The product is non-rapid degradable, and low or not highly bioaccumulative.
 General notes: Water hazard class 1 (Self-assessment): slightly hazardous for water Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.
 Results of PBT and vPvB assessment
 PBT: None of the ingredients is listed.
 vPvB: None of the ingredients is listed.
 Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

- · Recommendation: Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Uncleaned packagings: Recommendation: Dispose of according to your local waste regulations.

14 Transport information

· UN-Number · DOT, ADN, IMDG, IATA	not regulated
UN proper shipping name DOT, ADN, IMDG, IATA	not regulated
· Transport hazard class(es)	
· DOT, ADN, IMDG, IATA · Class	not regulated
· Packing group · DOT, IMDG, IATA	not regulated
· Environmental hazards:	Not applicable.
 Special precautions for user 	Not applicable.
 Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code 	he Not applicable.
· UN "Model Regulation":	not regulated
